```

I unfortunately ran out of time, so I am listing my output for what was intended to serve as data for the scatterplot. I iterated through the .java files and there were a total of 17 files that had commits made. Out of those 16, the rootbeerlib/src/main/java/com/scottyab/rootbeer/RootBeer.java file had the most commits made to it and Matthew Rollings made the most contributions out of the authors.
